Experience

Instituto Nacional de Medicina Genómica - Internship

(<https://github.com/victormhp/gentleman-programming--store>)

Developed a dynamic web application that empowers users to create and visualize epidemic networks. Using Sveltekit, D3 and Flask.

Projects

E-commerce Website (ReactJS & Firebase)

(<https://github.com/victormhp/gentleman-programming--store>)

Developed an E-commerce website using ReactJS and Firebase, creating a seamless shopping experience with real-time updates and streamlined order processing.

Notes Application (PERN Stack)

(<https://github.com/victormhp/pern-notes>)

Developed a feature-rich notes application using the PERN stack, providing users with an intuitive platform to create, manage, and organize their notes efficiently.

Discord Bot (Typescript)

(<https://github.com/victormhp/lol-players-killer>)

Crafted a Discord bot with TypeScript, capable of automatically detecting users activity and assigning custom roles. The bot also sends real-time notifications to a designated text channel.

Education

2021 - Current

Bachelor of Computer Systems, Universidad Español

Skills

Programming Languages

Javascript
Typescript
Python
C

Libraries & Frameworks

React, NextJS, Svelte, Sveltekit, D3,
Express, Flask

Tools & Platforms

SQL, MySQL, Postgres, Git, Github,
(Neo)Vim, Postman

Languages

Spanish - Native

English - Advanced Level

Interests

Data analysis, web development,
guitar and videogames
