## Work

### Instituto Nacional de Medicina Genómica

Full-Stack Developer - Internship

August 2023 - February 2024

- Developed a dynamic web application enabling users to create and visualize epidemic networks.
- Utilized **SvelteKit** for the frontend, **D3** for data-driven documents, and **Flask** for the backend.
- Collaborated with a team of researchers to ensure accurate representation of epidemic data.
- Deployed and maintained the application on the institute's server, ensuring high availability and scalability
- Contributed to project documentation and provided technical support to end-users.
